

BLAM! BLAM! AARGH!

LARGER THAN LIFE HEROES

Daniel Mersey expands on the possibilities for his action-packed skirmish game with some powerful heroes.

You may recognize some or all of these characters from movies. These are tough hombres who are the equivalent of at least half a Squad each ... OK, maybe not the Zombie, but certainly the others!

If a character here has a higher Shoot Dice number than the weapon's usual value, along with any special rules, this represents superior skill - the same goes for Protect Dice and Fight Dice. Morale is naturally always high for these impressive characters. Special rules are already factored into the dice numbers/values.

I've suggested some figures that can be used to represent each character. You can, of course, use whatever model you want but my own picks should leave little ambiguity as to who each of the heroes represents.
